

AIT Certificate Course on

Carbon Footprint & LCA Fundamentals for ESG Frameworks

Jointly Organized by

Office of Sustainable Campus (AIT-OSC) & AIT Extension (AITE)

14–15 March 2026

Unlock the Power of Carbon Insights and LCA with AIT's ESG Masterclass

As climate action and ESG disclosure become central to regulatory, financial, and market expectations, organizations are under increasing pressure to measure, manage, and communicate their environmental impacts credibly. Carbon footprinting, Life Cycle Assessment (LCA), and ESG frameworks are no longer optional—they are essential tools for risk management, compliance, and long-term sustainability strategy.

This intensive certificate course equips professionals with practical, decision-oriented skills to integrate carbon accounting, LCA, and ESG frameworks into organizational planning and performance.

Why join this course?

- Understand organizational carbon footprints (Scopes 1, 2 & 3)
- Apply Life Cycle Assessment (LCA) concepts in real-world contexts
- Interpret leading ESG frameworks (GRI, TCFD, ISSB, SASB, CSRD)
- Translate technical data into actionable ESG strategies
- Learn through case studies, group exercises, and expert guidance

Course Fee :

- USD 350 – (In-person)
- USD 300 – (Online)

Early-bird Registration : (Until 15 February)

- USD 300 – (In-person)
- USD 250 – (Online)

Additional Discounts Available for:

AIT students, Staff, Alumni, and group registrations
